Star Interior Solutions

Passion (pa-shon) – A strong liking or desire for or devotion to some activity, object or concept. (Merriam-Webster, Inc.)

My passion is decorating in an affordable manner. Interior redesign and real estate staging is just that – transforming your home using your existing furnishings, artwork and accessories. Your room reflects your personality, your history, and your interests – all in the very best setting. I apply my creative touches to provide an exciting, yet livable space.

My creativity has taken many turns throughout the years. During my years as a hairstylist and administrative assistant, I implemented my artistic and organizational skills. More importantly, during my years as a homeowner, I practiced decorating on a budget. During the sale of our home, our Realtor walked through the door and immediately noted that we did not have to do a thing to prepare the home for sale. That is when the seed was planted for a career in real estate staging and interior redesign.

My specialty is accessorizing. This is the finishing layer in the redesign and staging process. I prefer to accessorize with the unexpected for greater impact in a room. Tips for inexpensive, unexpected decorating to update your decor:

- Consider multiple uses for items:
 - Sheets: bedding, window treatments, table runners....
 - Plates: dinnerware, candle holders, artwork, centerpiece base.....
 - Cups and saucers: dinnerware, candle holder, q-tip and cotton ball holder in the bathroom, fresh flower arrangement base.....
- Shop at unexpected places for accessories: garden centers, fabric stores, hardware stores, closeout stores, etc.
- Shop during end-of-season clearance time for the very best pricing.

Chances are, you already have all of the elements for an amazing room. Before you shop for more accessories or furnishings, contact Star Interior Solutions. Let us creatively transform your space for a.....*room solved.*
